GO GREEN AND REDUCE YOUR CARBON FOOTPRINT

Unplug electronic devices when not in use.

Replace low-efficiency light bulbs with LEDs.

Buy Energy Star appliances and electronics.

Use a programmable thermostat.

Repair leaky faucets and toilets promptly.

Drink tap, not bottled, water.

Reduce, reuse, recycle, and compost.

Support local merchants and farmers.

Take public transportation, or even better - bike or walk.

Enroll in Alameda Green, AMP's 100% renewable energy option.

A carbon footprint is a measurement of how much greenhouse gas a product, service, country, or a person generates over a period of time. It is used to understand the impact human activity is having on the earth's climate. A personal carbon footprint is the emissions caused by an individual's consumption. It is a measure of how a person's lifestyle contributes to climate change.
