ALAMEDA MUNICIPAL POWER

A Department of the City of Alameda

WHO

All households in Alameda

WHAT

Two complimentary LEDs
from Alameda Municipal Power

WHEN

At the end of January 2015

WHY

When every Alameda home replaces two incandescent light bulbs with two LEDs, we will reduce electricity by 54,750,000 kWh over the next 10 years, which is equal to 37,750 metric tons of carbon dioxide equivalent ¹.

HOW

The funding for this program² comes from the short-term sale of some of AMP's renewable energy not needed for compliance with the state's Renewable Portfolio Standard.

(1) Source: US Environmental Protection Agency (EPA)

(2) The funds from the sale can only be used to reduce GHG emissions. The LED program is just one of the projects AMP has planned to reduce Alameda's carbon footprint in 2015. To learn more visit www.alamedamp.com/ghg.
